1. Claims 1-5 and 7-30 are pending in this application.

Claim 6 has been canceled per applicant's request in the amendment filed April 30, 2003.

2. The rejection of claims 1-19, under the 35 USC 112, second paragraph statute, has been withdrawn.

3. The rejection of claims 1-4, and 7, under the 35 USC 102/103 statute, has been withdrawn.

4. NEW GROUNDS OF REJECTION:

A.) Claims 1-5 and 7-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 4, 5 and 8 are indefinite for depending from claim 20.

Correction is required to comply with U.S. Patent practice.

B.) The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of U.S. Patent No. 6,228,605. Although the conflicting claims are not identical, they are not patentably distinct from each other because the reactants in the instant materials, compositions and products claimed in the present invention were previously described in the inventions claimed in U.S. Patent No. 6,228,605 for performing the same functions. The inventions differ in that the instant invention set forth particle sizes and optionally describes the use of a bactericide reactant in the instant materials, compositions and products claimed. However, it is noted that the inventions claimed in U.S. Patent No. 6,228,605 recites the reactants claimed in the instant invention for use in methods that perform the same functions. The inventions of U.S. Patent No. 6,228,605 are deemed to sufficiently encompass all particle sizes and the optional reactants as claimed in the instant invention. Thus, there is substantial overlap of the subject matter claimed in both inventions.

5. The Marshall patent (US 6,479,278) has been cited to further show the state of this art.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1654

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
